MESSAGE FROM MANAGING DIRECTOR

As we have just celebrated the Independence Day, I urge all of you to understand the true meanings of independence. This day stands as a powerful reminder of the freedom we enjoy today - a freedom that was earned through immense struggle, sacrifice and unwavering determination. Independence is not just a historical milestone, it is the foundation upon which our nation has been built. It is the right to think freely, to live with dignity and to pursue growth and opportunity. It allows us, as individuals and as a nation, to shape our own future.

We must never forget the visionary leadership of Quaid-e-Azam Muhammad Ali Jinnah and Allama Muhammad Iqbal who guided our country to freedom. The leaders of our independence movement demonstrated extraordinary courage, unity and resilience. Their clarity of purpose and commitment to justice set the course for a free and sovereign nation. Their legacy is a call to each of us - to lead with integrity, to act with purpose and to contribute meaningfully to the progress of our country.

Equally, we owe an immeasurable debt of gratitude to our brave armed forces, who continue to safeguard our hard-earned independence. Their sacrifices, their vigilance, and their dedication to protecting our sovereignty allow us to live in peace and pursue our goals with confidence. We salute their services and stand in solidarity with them and their families.

As individuals and as an organization, we have a vital role to play in building a stronger and more successful future of Sui Northern. Every innovation we bring, every challenge we overcome and every goal we achieve contributes not just to the success of Sui Northern, but also to the growth and reputation of our country. Together, let's be the force that drives positive change. Let's make Sui Northern a symbol of innovation, integrity and impact that our country can be proud of.

ASHRAF SADPARA SUMMITS THE SNGPL NANGA PARBAT EXPEDITION 2025

Muhammad Haroon

From pipelines to peaks, SNGPL continues to showcase the strength of vision, resilience and excellence. The journey of Ashraf Sadpara, a proud member of the SNGPL Mountaineering Team, stands as a living example of how determination, when nurtured with organizational support, can transcend limits. Supported wholeheartedly by SNGPL, Ashraf Sadpara has climbed all the five peaks of Pakistan which are above 8,000 meters - without using supplementary oxygen: K2, Nanga Parbat, Broad Peak, Gasherbrum-I and Gasherbrum-II. Each summit reflects his courage and SNGPL's commitment to taking Pakistan's name to the highest altitudes.

Born in Sadpara village, near Skardu, Gilgit Baltistan, Ashraf grew up amidst towering mountains that shaped his destiny. From an early age, he watched his father as climber, navigate treacherous routes for the Army on high mountains, and participate in rescues that saved lives. Inspired by this legacy of courage and service, Ashraf Sadpara nurtured a dream to follow his father's footsteps. He began his own journey as a high altitude porter, where he built his reputation through discipline, skill and endurance. Over the time, he transformed into one of the Pakistan's most accomplished climbers. His career has been powered not only by personal grit but also by the strong backing of SNGPL since his joining SNGPL Sports Cell in 2015.

Among his remarkable feats is his bond with K2, where he achieved three consecutive successful summits (which is a record for Pakistan) – 2022, 2023 and 2024, without supplementary oxygen. These climbs placed him among a rare league of mountaineers worldwide and reflected world class consistency. He also summited Broad Peak in 2023, before his defining ascent of Nanga Parbat in July 2025, which crowned his five above 8,000 meter achievements in Pakistan. He proudly raised Pakistan as well as SNGPL flag on K2, Broad Peak and Nanga Parbat.

The year 2025 became a year of success for

SNGPL, not only in terms of corporate profits but also in the realm of sports and adventure. Ashraf Sadpara's Nanga Parbat climb symbolized this dual triumph, uniting business and athletic milestones under the same banner of excellence.

Before his departure, the Managing Director SNGPL, Amer Tufail; DMD (Services), Faisal Iqbal; DMD (Operations), Saqib Arbab; President (Sports Cell), Imtiaz Mehmood and Members of Steering Committee of Sports Cell conveyed their warm wishes on behalf of the Company and employees across Pakistan. On his return, the Managing Director personally welcomed him and the celebration was made even more memorable as it coincided with Pakistan's Independence Day. The SNGPL family marked it as a national moment of pride, raising both the SNGPL and Pakistan flags high.

Ashraf Sadpara also met with Chairman, SNGPL Board of Directors, Muhammad Ismail Qureshi, along with other members of the BoD of SNGPL, including Saadat Ali Khan and Ahmed Chinoy, H.I, S.I. These meetings were a recognition of his achievements and a reinforcement of SNGPL's vision to promote sports and adventure. Their appreciation echoed the organization's belief that success in the mountains translates into inspiration for the entire nation.

Ashraf Sadpara extended heartfelt thanks to the Chairman, the Managing Director, President Sports Cell and the SNGPL Management for their unwavering support.

With five Pakistani 8,000+ meters peaks achieved without supplementary oxygen, the horizon ahead is full of promise. Here is a summary of his major climbs above 8000 meters:

- K2 (8,611 m) — 2022, 2023 and 2024
- Nanga Parbat (8,126 m) — 2025
- Broad Peak (8,051 m) — 2023
- Gasherbrum-I (8,080 m) — 2009
- Gasherbrum-II (8,035 m) — 2008

SNGPL PARTICIPATES IN ICAP-CIPFA CONFERENCE ON PUBLIC FINANCIAL MANAGEMENT ECOSYSTEM

Raheel Farooq

Sui Northern Gas Pipelines Limited (SNGPL) proudly participated in the prestigious conference on "Building a Resilient Public Financial Management Ecosystem", jointly organized by the Institute of Chartered Accountants of Pakistan (ICAP) and the Chartered Institute of Public Finance and Accountancy (CIPFA). The event was held in August 2025, at Serena Hotel, Islamabad, and brought together key stakeholders to explore transformative strategies for strengthening Pakistan's fiscal governance framework.

The conference was graced by Senator Muhammad Aurangzeb, Federal Minister for Finance and Revenue, as Chief Guest. In his keynote address, he emphasized the urgency of aligning Pakistan's financial management practices with global standards and reaffirmed the government's commitment to transparency, accountability and reform-driven governance. Key sessions featured renowned national and international speakers, including Dr. Musadik Malik, Federal Minister for Climate Change and Environmental Coordination; Muhammad Ali, Minister for Privatization Commission; and Ross Smith, Program and Technical Director, International Public Sector Accounting Standards Board (IPSASB).

Representing SNGPL, Faisal Iqbal, Deputy Managing Director (Services), participated in the high-level panel discussion on "SOE Act Compliance: Challenges, Progress and Opportunities." He was joined by Senior Executives from SSGC, PSO, SECP and the Ministry of Finance.

As part of its sponsorship, SNGPL also hosted a dedicated booth that highlighted its 60+ years of excellence in gas transmission and distribution. The exhibit showcased the Company's expanding role in EPC (Engineering, Procurement and Construction) services, underscoring its capability to deliver end-to-end infrastructure solutions in the energy sector.

The conference was attended by senior SNGPL leadership, including Kamran Akram (Chief Financial Officer), Imtiaz Mehmood (SGM - Corporate Affairs / Company Secretary), Raheel Farooq (General Manager - Accounts) and other Senior Executives, reflecting the Company's strong engagement in thought leadership and policy dialogue.

The Writer is General Manager (Accounts), Head Office.

MOBILIZING THE SPECIAL TEAMS TO ADDRESS FLOOD EMERGENCY

On the instructions of the Managing Director Sui Northern Gas, the Company has constituted special emergency response teams to deal promptly with any situation arising from the recent flood conditions across the country.

With the forecast of high-level flooding in the Ravi, Sutlej and Chenab rivers, Sui Northern Gas field staff had been placed on round-the-clock alert in Lahore, Narowal, Sialkot, Gujrat, Hafizabad, Bahawalpur, Multan, Kasur and adjoining areas. Continuous monitoring is being carried out to safeguard the gas infrastructure and ensure smooth gas supply to the consumers. As a precautionary measure, gas supply in areas affected by floods was temporarily suspended to prevent any risk to life or property. This decision was taken strictly to ensure the safety of public and to maintain the integrity of the system.

The public is being appealed to fully cooperate with the teams operating in the field. This cooperation is vital to ensure that all preventive and corrective measures can be implemented swiftly and effectively.

Managing Director Sui Northern Gas has advised all the Regional General Managers to remain on station and maintain round-the-clock vigilance to ensure uninterrupted restoration of gas supply in flood-affected areas. The Managing Director has lauded the unwavering commitment of Sui Northern teams working under extreme conditions and reiterated instructions regarding sustained efforts for complete restoration of gas supply to every affected consumer.

WE CARE . . .

People, Profession, Planet

OCCUPATIONAL HEALTH SURVEILLANCE CAMPS

Shumaila Azam

HSE Department's initiative of Occupational Health Surveillance Camps has proved to be helpful in promoting health care awareness and on spot health screening of employees. It also provides an excellent opportunity for provision of information about general HSE initiatives. There is a difference in occupational health surveillance and general health screening, which is important to understand. HSE standards focus on occupational health surveillance which monitors the early impact of work-related diseases in potentially at-risk employees. These hazards include noise, vibration, ergonomic hazards, radiation, smoke, dust, biological agents or any substance known to be hazardous to employees.

SNGPL is certified against ISO 45001:2018 and ISO 14001:2015, therefore, occupational health monitoring of the employees including drivers, computer operators, food handlers, sanitation staff and the employees exposed to noise, dust, fumes and radiations is essential for an early detection of any ill-health issue and thereafter follow-up by the respective employee through his medical treatment if so required.

Through these camps, employees are facilitated under one roof to give needed attention to their health within a reasonable time out of their busy work environment, job stress and frequent travelling.

Basic and specific disease related screening tests carried out at the medical camps include:

- Blood sugar level screening
- Height and weight
- Hypertension
- Hepatitis B and C screening
- E.C.G.
- Eye refraction
- Audiometry
- Pulmonary Function Tests
- General medical check-up

In today's world the proportion of population suffering from Diabetes, Hypertension and Hepatitis B and C has increased considerably. These tests are selected keeping in view the prevalence of symptoms in general population and their adverse health effects. Hepatitis 'B' & 'C' screening has resulted in identification of certain employees who were unaware that they are suffering from this disease. They were counseled for further confirmatory tests and treatment.

Specific tests of Pulmonary function, Audiometry and Eye refraction were conducted. Pulmonary function test is carried out for only those employees who are exposed to vapours or dust during their daily routine. It checks the lungs capacity and various other confirmatory parameters of lungs disorders. Audiometry test is carried out for those employees who are exposed to high noise during work. Eye refraction is an essential test for all drivers and personnel using computer during their job performance. This test forms the basis of recommendation for any change in their eye sight status.

After going through all the screening, Occupational Health Consultant examines the result of each individual and gives specific advice on their health. Change of life style and steps for improving health condition are the basic recommendations.

In FY 2024-25, a total of approximately 4426 employees across the Company received health check-ups in occupational health surveillance camps.
